Work Experience

Bloomberg Tech Fellow at Digital Accelerator Programme May 2022 – Present

- Making strategic improvements to our technology infrastructure so that we can continue to reach and engage new audiences with dynamic programming.
- Working with a tech mentor to build a 5 year budget forecast, a project charter describing long and short term goals with key milestones and presenting my plan to the trustees including how the project will align to the organisations aims and objectives while migrating risks.
- Writing up pre KPIs to assess further down the line.
- Commissioning a design agency to build an asset library that I have translated to a digital component library to build new templates across the website as part of the rebrand overhaul of the gallery.

Digital Manager at National Portrait Gallery, London June 2020 – Present

- Managing the website including project microsites by keeping it accurate, up to date and to meet clear accessibility guidelines with over 16.7 million page views and 4 million visitors online a year.
- Created an award winning website Hold Still with the Duchess of Cambridge and Kensington Palace which has attracted over 6.5 million page views and generated over 54k from publication sales.
- Designed pages using CSS and HTML with a user-first approach to attract over 9% more users than last year. In the process of create a digital component library to build new templates and share with developers.
- Working with colleagues across the organisation to improve the overall digital experience online and onsite, being advisor on digital with over 200 employees.
- Driving up impact through product design, content and functionality and seen the website attract over 15% more users on last year.
- Creating statistical dashboards for all staff and reporting monthly on website figures so that we are all able to make better-informed decision on digital products using Google Analytics and Data Studio.
- Removing broken links and spelling mistakes across the website fortnightly to keep the website error free.
- Managing digital inbox to respond to website queries on a daily basis with over 10,000 emails a year
- Managing two digital officers

New Media Manager at National Portrait Gallery, London August 2012 – May 2020

- Transforming and redesigning over 10 new/existing templates within ModX (CMS) using CSS at zero cost to the organisation, which has increased visitor engagement across the website.
- Promoting digital activities daily across the organisation by creating banners for the website.
- Managing public facing interactives both in London and nationally.
- Digital advisor to the organisation on all digital products
- Leading accessibility changes on the website through HTML, CSS mark up and colour contrast changes to over 8,000 pages.
- Launching mobile site with responsive design
- Producing KPIs for digital activity across the organisation using Google Analytics and Excel.
- Working with others in the organisation on the digital strategy through discussion and group sharing workshops.
- Managing a team of two others and training an apprentice from the ground up who had no previous experience.
- Manage a sub team budget for training/travel and hardware purchases
